

August 22, 2011

To: All ATCO Pipelines and NGTL Customers

On Friday, August 19, 2011 NGTL received NEB Approval of the Application for Final 2011 Tolls for the Alberta System and Implementation of Alberta System Integration.

In accordance with the Board's decision, NGTL and ATCO Pipelines have identified an Integration Effective Date of October 1, 2011.

In the NGTL bulletin issued July 20, 2011, NGTL advised it would re-issue revised Service Agreements and Schedules of Service to ATCO Pipeline Customers once a new Integration Effective Date was known. NGTL will re-issue Service Agreements and Schedules of Service that reflect the shipper elections made during the contract election process initiated on June 30, 2011 with an effective date of October 1, 2011.

NGTL is currently in the process of revising these Service Agreements and Schedules of Service and will distribute to Customers shortly.

In addition, in compliance with the Board's Decision, NGTL will file for final 2011 rates, tolls and charges shortly. The rates filed will be the same as the rates proposed in the Application for Final 2011 Tolls for the Alberta System and Implementation of Alberta System Integration.
