

# Serving You Better

In the coming weeks, ATCO crews or contractors will be in your neighbourhood.

We're upgrading our natural gas distribution system and meet growing demands for safe and reliable natural gas service for Alberta's largest centres.

What this means for you:

- Crews may be planning the route which includes marking the alignment.
- Staking and/or soil testing may take place.

Whether it's heating your home or providing that blue flame to cook family meals, we help ensure natural gas is always there when you need it.
